

# RISK TYPE COMPASS RISK LANDSCAPE PRICE LIST 2025

The Risk Type Compass decision-making tool identifies our risk instincts, enhancing decision-making performance at all levels of the organisation.

## Risk Type Compass reports

In addition to Risk Type designation and its implications, the 10 page Risk Type Compass (RTC) Personal Report features several levels of analysis designed to explore its implications and to guide the recipient towards a fuller understanding; explaining and familiarising them with the benefits and challenges revealed by the RTC assessment. This assessment has an average completion time of 15–20 minutes.

This accounts for intra-individual differences as well as the deeply rooted temperament which is our Risk Type.

## Risk Type Landscape

The RTC Survey provides a portrayal of Risk Culture within divisions, regions, functions or across complete organisations. Results are based in exceptionally reliable measures of individual risk propensities that will have a significant impact on decision making. The survey highlights risk of group think, resistance to change, creativity, psychological safety and much more.

## Risk Landscape Survey

Priced by numbers of participants surveyed, each receives a one-page Risk Type report. Full report upgrades and Team Reports also available at list price.
